Please settle the Microsoft case with the current findings.

We feel the prosecution of Microsoft has been and is detrimental to the entire economy. The public has been penalized by actions of the federal government in this unreasonable prosecution by the government, Microsoft competitors, various states where the competitors reside and a prejudice judge. We feel Microsoft has a better product and should not be prosecuted for making the best successful economy in history and its prosecution led to the recession. It appears the other giants, i.e. Exxon and Mobile, merging banks, merging lumber companies, etc., manage to merge and be monopolistic to the detriment of the regular citizen causing increased prices and the federal government does not interfere.

While Microsoft gets punished for going it alone (without political aid) and the other giants lobby Congress, we (everyday citizens) have to pay the higher prices.

Please settle this matter with the current decisions and do not carry it out any longer. Forcing Microsoft to help their competitors is unAmerican.

Sincerely,

Joe Brennan
